Summary

Computer Science Engineering student and AI product builder with hands-on experience in full-stack development using React, FastAPI, Python, OpenCV, Firebase, and Docker. Strong foundation in computer vision, ML classification, backend APIs, and cloud deployment.

Technical Skills

- **Languages:** C++, Python, SQL
- **Frameworks and Tools:** ReactJS, Tailwind CSS, FastAPI, Flutter, Firebase, MySQL, SQLite, Figma, Docker, Git, Vercel, DigitalOcean
- **AI/ML:** OpenCV, scikit-learn, HuggingFace, DeepFace, computer vision, model evaluation
- **Coursework:** Data Structures and Algorithms, Object Oriented Programming, Database Management System

Education

VIT Bhopal University	May 2023 – May 2027
B.Tech. in Computer Science Engineering	
St Theresa Girl's School, Bhopal	Mar 2022 – Mar 2023
Class XII – Science	

Work Experience

Vault of Codes	July 2024 – Aug 2024
Frontend Developer	Remote
• Redesigned and enhanced company website interfaces, improving usability, accessibility, and responsive user experience. • Integrated frontend interfaces with backend systems and built interactive UI components using HTML, CSS, and JavaScript.	

Projects

GitSee	Jan 2026 - Feb 2026
GitHub Repository Discovery Dashboard	React, Tailwind CSS, GitHub API, Vercel
• Built a responsive web dashboard to search, filter, compare, and save GitHub repositories using the GitHub Search API and advanced filters. • Designed repo scoring and comparison features with language, stars, license, activity, and topic filters to evaluate open-source projects faster. • Added saved repositories, detailed repo drawers, mobile filter panels, polished responsive UI, and Vercel deployment with optimized loading.	

PersonaShield AI	Mar 2026 - Apr 2026
AI-Powered Identity Protection Platform	React, FastAPI, Python, HuggingFace, DeepFace, SQLite
• Developed a full-stack platform for deepfake detection and identity verification using image, video, and audio analysis. • Implemented face matching, voice verification, AI reasoning, authenticity scoring, and forensic-style PDF report generation. • Built a React frontend with a FastAPI backend using HuggingFace inference models, DeepFace embeddings, and SQLite/Supabase-ready storage.	

ShadeSense AI	May 2026 - Jun 2026
AI-Powered Makeup Shade Recommendation System	React, FastAPI, Python, OpenCV, scikit-learn, Docker
• Developed a full-stack AI platform that analyzes selfie uploads to detect skin tone, undertone, shade depth, and lighting quality. • Built a computer vision pipeline using OpenCV for face detection, skin-region extraction, lighting normalization, and dominant color analysis. • Implemented ML-based shade classification with 39 color features and a RandomForest model achieving 80.3% test accuracy. • Created explainable recommendations with CIE-LAB Delta-E matching, virtual try-on, multi-face analysis, skin health indicators, and Docker/pytest deployment.	

Certificates

- AWS Certified Cloud Practitioner; Microsoft Certified: Security, Compliance, and Identity Fundamentals; Cloud Computing, NPTEL
- MERN Stack Developer, Ethnus; Machine Learning, Coursera; Python Programming Certificate; Web Development Certificate

Leadership / Extracurricular

NETRIK 2026:
• Built a machine learning based application at the Netrik Hackathon held at IIIT and advanced to the final round as a top 10 finalist team. • Presented the ML approach, data flow, and evaluation outcomes to judges while communicating product impact and technical decisions.
Hacknovate 7.0:
• Placed in the top 20 out of 400 teams at Hacknovate 7.0, a 30-hour hackathon held in Delhi-NCR. • Built and presented a complete project within the 30-hour sprint while competing in a fast-paced, high-intensity hackathon environment.
